

# Boulderboard® 6 Foot training station

The Boulderboard6 is a small, freestanding training wall designed for climbing-focused and upper body power training. It is attractive, light weight and can be easily collapsed flat for storage. It can be ordered in a Base version with frame and panels only or the Pro Package that is fully outfitted with a crashpad and 39 training holds. It is used in both residential and commercial training areas.

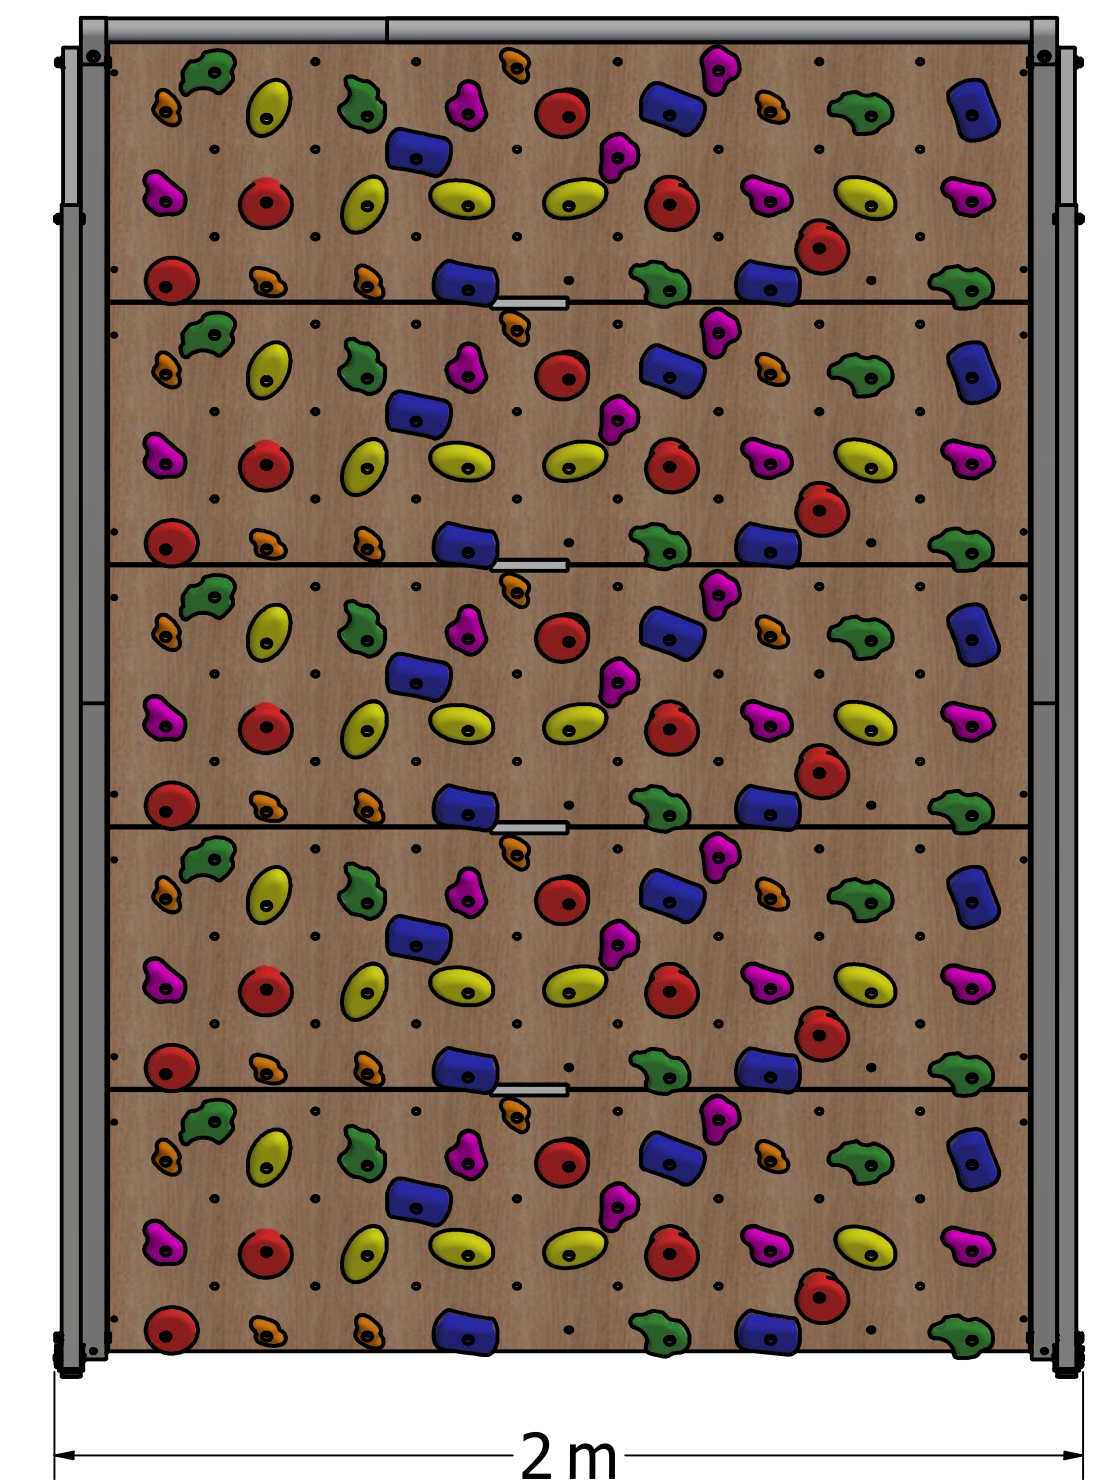

The Boulderboard6 Base unit can fit under a 2.5 meter ceiling at it's steepest angle of 40 degrees, with an angle extension that allows multiple angles up to 17 degrees with taller ceilings. The unit has a 1.8x3 meter climbing surface equipped with a generous 255 threaded potential hold locations. The top has a sturdy pullup bar for additional training options.

Boulderboard® Angles		
Angle (degrees overhung)	Extender hole	Height (mm)
17	5	2997
22	4	2921
27	3	2819
32	2	2692
36	1	2565
40	No extender	2413

## Specifications:
